I'm going to do 3. I'll do 4. I doing</p> <p>33- Helen and her brother are six feet tall. Helen's brother is her. 1. as tall as 2. taller than 3. the tallest 4. much taller</p>	۱۰
۳	<p>درک مطلب: متن زیر را بخوانید و به سوالات به صورت خواسته شده پاسخ دهید.</p> <p>The moon and the stars are not the only objects shining in the sky. There are also planets. The sun has nine planets going around it. We live on one of these, the third planet from the sun, Earth. The Earth moves around the sun once every year. It's about 150 million kilometers away from the sun. The planets that are nearer to the sun takes less than a year to go round the sun once. Mercury is the closest to the sun, just 58 million kilometers away. Then comes venus. Planets that are father away from the sun take more than a year to orbit the sun. The most distant planet is pluto. It takes over 247 years to go round the sun. Planets don't send their own heat or light like the sun. They shine in the sky only because the sun shines on <u>them</u>. They reflect the sun's light just like the moon does. The planets nearest to the sun are too hot to live on, while those farthest away are too cold. Living things would not be able to live on these planets. The biggest planet by far is Jupiter. The most beautiful is Saturn, the sixth planet from the sun. Its beauty comes from the rings around it.</p> <p>34- We live on a planet called Earth. 1. True 2. False 35- Venus is closer than mercury to the sun. 1. True 2. False 36- Planets have light from their own. 1. True 2. False 37. Some planets take less than a year to go round the sun once. 1. True 2. False 38- Planets reflect light. 1. the sun's 2. the moon's 3. other planet's 4. no 39- In paragraph 4, "them" refers to 1. planets 2. heat and light 3. the sun 4. living things</p>	۱۱
